Direct Hay Weighted Average Report for week ending 6/9/2023

Volume							
	This Week	Last Reported (5/29/2023)	Last Year				
Tons:							
Нау	400	1400	0				
Total	400	1400	0				

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last Friday, not enough reported sales this week for accurate trends, a weaker undertone was noted. Most of the trade area has new crop on the ground but because of rain a large portion is bleachy and standing supplies are getting more mature as growers wait for the rain to stop before cutting. Carryover supplies both tarped and untarped weigh on the market. Dairies continue to receive Milk protection program checks as milk prices remain low. Trade remains slow with light to moderate demand.

South Central								
Hay (Conventional)								
Alfalfa - Fair/Good (Trade/Per Ton)								
Large Square 3x4	<u>Qty</u> 400	Price Range 220.00	Wtd Avg 220.00	<u>Freight/Use</u> F.O.BFeedlot/dairy	<u>Description</u> Rain Damage	<u>Crop Age</u> Old Crop
